DETAILED ACTION

1. Claims 1-21 have been cancelled. Claims 22-34 have been added.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 22-28, drawn to a method for determining defined states or modifications in the mucous membrane of the uterus.

Group II, claim(s) 29 and 31, drawn to an antibody recognizing endometrical hCG, and not trophoblastic hCG and a peptide of SEQ ID No. 1 or 3 or partial sequence thereof.

Group III, claim(s) 30-31, drawn to an antibody specific for trophoblastic hCG, not endometrial hCG, and specific for SEQ ID No. 2 or 4.

Group IV, claim(s) 32, drawn to amino acid sequence SEQ ID No. 10.

Group V, claim(s) 33, drawn to a gene of SEQ ID No. 7.

Group VI, claim(s) 34, drawn to a peptide selected from SEQ ID No. 1, 3, 12 or 14.

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

With respect to invention II, the partial sequence taught by Antakly et al. (US 20040253608 SEQ ID No. 11) has about 90% homology to the recited SEQ ID No. 3.

It is also an obvious matter to one ordinary skill in the art to make antibody specific to this partial SEQ ID No. 3 because the Board of Patent Appeals and interferences has taken the position that once an antigen has been isolated and sequenced, the manufacture of monoclonal antibodies against it is *prima facie* obvious. See Ex parte Ehrlich, 3 USPQ 2d 1011 (PTO Bd. Pat. APP. & Int. 1987), Ex parte Sugimoto, 14 USPQ 2d 1312 (PTO Bd. Pat. APp. & Int. 1990).

Furthermore, with regarding to group V, Bellet et al. (US 6514708; SEQ ID No. 6) disclose SEQ ID No. 7 gene.

Thus, the instant invention does not have novelty under Rule 13.1, and it is deemed of lack of unity.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined. In the event of rejoinder, the requirement for restriction between the

Art Unit: 1641

product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims.

Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01. Any inquiry concerning this communication or earlier communications from the examiner should be directed to JACOB CHEU whose telephone number is (571)272-0814.
